

**STOTFOLD ARCHAEOLOGICAL  
LANDSCAPE, BEDFORDSHIRE  
PROJECT CODE: SOU-07/44**

**Date of survey:**  
February 2007- November 2009

**Archaeology:**  
A multi-period site with a great density of archaeological features and a predominance of Saxon settlement remains extending over c. 23 hectares. Discovered by field evaluation in the course of PPG16-initiated investigation, the site is being recorded in advance of a large-scale residential development.

**Survey requirements:**

*Evaluation*

- Representative coverage of the site (5%) requiring the stake-out of 194 evaluation trenches. This was achieved using a Leica System 500 GPS with a Receiver used to fix a control network to Ordnance Survey coordinate system and orthometric heights Ordnance Datum.
- Acquisition of OS coordinates from an AutoCAD drawing for each end of trench.
- Supply of height information (OD)
